## Description

As an engineering student, I am seeking a position after graduation related to Microsoft Power Platform, where I can transform requirements into simple, reliable, and maintainable solutions that serve users.

## Expérience

### Work-study program - Power Platform Developer

**TotalEnergies** *September 2023 - September 2026*

- Identification of business needs
- Design, development, and maintenance of business applications with Power Platform (Power Apps, Power Automate, Power BI)
- Support and training for business teams (110+ users)
- Creation and migration of Dataverse and SharePoint databases

### Internship - Full Stack Developer

**Université de Pula** *June 2025 - October 2025*

- Drafting specifications and understanding business needs.
- Website development and design (React.js, TailwindCSS, PHP, MySQL, Github, etc.)
- Drafting technical documentation.

### Internship - SharePoint Developer

**Safran Helicopter Engines** *April 2023 - July 2023*

- Analysis and understanding of department workflows
- Development of a SharePoint site
- Documentation and user training

## Training

### Computer Engineering Program

**CESI** *September 2023 - September 2026*

### Integrated preparatory class

**CESI** *September 2021 - September 2023*

### High school

**Immaculée Conception** *September 2018 - September 2021*

- High school diploma with honors
- Specialization in Mathematics, Physics, and Life and Earth Sciences

## Skills
